PUNCTION: Nitrate reductase is a key enzyme involved in the first punction of the first seep of nitrate assimilation in plants, fungi and bacteria.

CATALYTIC ACTIVITY: Nitrite + NAD(+) + H(2)O = nitrate + NADH.

COPACTON: EACH SUBUNIT OF THE ENZYME CONTAINS 1 EQUIVALENT OF FIHEME IRON, AND MOLYBDENUM-PTERIN AS PROSTHETIC GROUPS. THE HEME GROUP IS CALLED CYTOCHROME B-557.
                                                                                                       SUBUNIT: Homodimer.

-I- CATALYTIC ACTIVITY: Nitrite + NAD(+) + H(2)O = nitrate + NADH.
-I- COFACTOR: EACH SUBUNIT OF THE ENZYME CONTAINS 1 EQUIVALENT OF FAD HEME IRON, AND MOLYBDENUM-PTERIN AS PROSTHETIC GROUPS. THE HEME GROUP IS CALLED CYTOCHROME B-557.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Cannons A.C., Iida N., Solomonson L.F.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               ENZYME REGULATION: REGULATED BY THE NITROGEN SOURCE A BY THE CIRCADIAN RHYTHM.

SY THE CIRCADIAN RHYTHM.

SUBUNIT: Homodimer (By similarity).

DEVELOPMENTAL STAGE: MAXIMUM EXPRESSION 2 HOURS AFTER SUN EXPRESSION FOUND 2 HOURS BEFORE AND 8 HOURS AFTER SUN SIMILARITY: TO EUKARYOTIC MOLYBDOPTERIN OXIDOREDUCTAS N-TERMINAL DOMAIN.

SIMILARITY: Contains 1 cytochrome b5. heme-binding dom SIMILARITY: TO FAD/NAD-BINDING CYTOCHROME REDUCTASES
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       FUNCTION: Nitrate reductase is a key enzyme involved in the first step of nitrate assimilation in plants, fungi and bacteria. CATALYTIC ACTIVITY: Nitrite + NADH(+) + H(2)O = nitrate + NADH. COPACTOR: EACH SUBUNIT OF THE ENZYME CONTAINS 1 EQUIVALENT OF FIHEME IRON, AND MOLYBDENUM-PTERIN AS PROSTHETIC GROUPS. THE HEME GROUP IS CALLED CYTOCHROME B-557.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               C-TERMINAL DOMAIN.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            128:147-154(1993).

-!- CATALYTIC ACTIVITY: Nitrite + NAD(+) + H(2)O = nitrate + NADH.
-!- COFACTOR: EACH SUBUNIT OF THE ENZYME CONTAINS 1 EQUIVALENT OF FAD, HEME IRON, AND MOLYBDENUM-PIERIN AS PROSTHETIC GROUPS. THE HEME GROUP IS CALLED CYTOCHROME B-557.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   reductase."

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Total number of hits satisfying chosen parameters:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Title:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
